## product ● **Douglas Fir beams & lumber**

*Douglas fir has long been a staple in North American construction because of its beauty and unique structural qualities. Artisans, architects and engineers love working with reclaimed, old-growth Douglas fir because of its size, strength, stability and character. New Doug fir beams and lumber cannot compare in either looks or structural quality to old-growth. Our Douglas fir is reclaimed from vintage agricultural and industrial buildings throughout western North America.*

**sources** ● Various dismantled structures throughout the western United States, including old barns, warehouses, mills and other structures.

**species** ● *Pseudotsuga menziesii.*

**colors** ● Golden honey with mellow orange overtones.

**dimensions** ● 1" to 14" thick x 1" to 14" wide by lengths up to 30' and longer.

**millwork** ● As-is, rough sawn or surfaced to client specification.

**character** ● Vertical and mixed grain with nail, bolt and other fastener holes, oxide stains, seasoning checks and sound tight knots. Character varies depending on specific inventory.

**finish** ● Comes unfinished, unless otherwise specified.

**LEED** ● MR 4.1 & 4.2 (Recycled Content) and MR 5.1 & 5.2 (Regional Materials).

## Reclaimed Woods from Around the World

**100%**  
recycled paper
